

Protection at Location™

Training • Safety Kits • DVDs/Videos • Consulting

A new color in safety.

What we do

Protection at Location™ (PAL) develops products, services and training to help individuals at any location stay safe during man-made or natural disasters.

On-site Training

PAL provides specialized training for organizations in areas of disaster preparedness and response based on the FEMA recognized community emergency response training.

Although we can customize training to meet your needs we see value in providing your employees training that is recognized by FEMA. This training incorporates all the elements needed to be recognized as a CERT member. Like our PAL Kits™ our pricing for this level of training is affordable. Your staff will learn to assist others in the workplace following an emergency/disaster when professional responders are not immediately available to assist. Protection At Location™ offers a turnkey program that provides your employees a life-skill that will serve them well at home, work and in the community.

Protection At Location™ offers numerous training options: training at your location, other pre-set trainings throughout the United States, and more. Consult us for a more specific quote based on your needs.

What is a PAL Kit™?

The PAL Kit™ is a line of prepackaged personal protective equipment that keeps employees and staff safe. The kit includes

recognized standard essentials one would need for personal protection during an emergency, in one convenient, on-site package. Also known as the Purple PAL, PAL Kit™ items are packaged in a distinctive purple helmet and include gloves, goggles, flashlight, whistle, N95 dust mask and glow stick. Because of its color, the helmet quickly identifies employees and staff to professional first responders on the scene. The PAL Kit™ is small enough to be stowed discreetly on a shelf, in a drawer or in a closet, allowing employees and staff to feel more secure.

Training Videos

In addition to safety kits, PAL offers employee training videos to incorporate new hires with the policies in place for emergency preparedness and response. We also offer videos on tips and ways to stay safe before, during and after a disaster. Samples topics include: Emergency Planning, Fire Extinguisher Use, HAZMAT, and more .

Giving Back

PAL is deeply committed to promoting emergency preparedness training worldwide. A portion of all PAL proceeds is returned to local, regional or national CERT programs. Our mission at Protection At Location™ is to expand the CERT Program to a larger community. Not only does this build a safer community but allows for a community to bond together and have a plan in place for the unexpected.

Key Benefits

It's easy. PAL Kits™ are pre-assembled, ready to use and require no maintenance. Each package includes global instructions that can be used in any country.

It's affordable. We strive to make safety affordable. The cost of PAL Kits™ is negligible compared to the potential savings in both human and financial capital. Contact us for a free quote.

It's smart. Offering your employees this valuable life skill is a commitment to keeping them safe, helps improve employee retention, and builds a strong community.

It's important. Emergency preparedness has never been more relevant. PAL emergency training is an invaluable skill to pass on to your employees.

PAL Training includes Disaster Preparedness, First Aid and CPR Certification, Fire Suppression, Light Search & Rescue, Disaster Psychology, Team Organization, Terrorism Awareness, Hands on Simulation, and more.

Based in Redondo Beach, CA. Proudly serving clients around the world.
